*Number of PGY-1 FM GME positions offered by state was sourced from the 2017 AAFP Residency Census and reflects positions at ACGME-accredited residency programs only. Positions in states without medical schools are: Alaska (12), Delaware (14), Idaho (29), Montana (18), Wyoming (14).

*Historical records for both the University of Arizona College of Medicine-Tucson and the University of Arizona College of Medicine-Phoenix have been combined to reflect the single accreditation the two campuses shared prior to the 2013-2014 academic year. The University of Arizona-Phoenix reported its first graduates in 2017, so the one-year data in this table are reported for the campuses separately.

**Historical records for the University of South Carolina School of Medicine, Columbia include the graduates of the previous University of South Carolina School of Medicine. In 2012, the University of South Carolina changed its name to the University of South Carolina, Columbia after opening a 2nd campus in Greenville. The institution maintained a consistent class size at its Columbia campus with the new campus opening. The University of South Carolina School of Medicine, Greenville had its first graduating class in 2016.

Table I: International medical schools with more than ten graduates entering ACGME-accredited family medicine residency programs in 2017. These results are based only on residency census data, and previous years' graduates have not been removed.
