Heart rate 30, apneic, cyanotic, unresponsive, a tiny 8-month-old boy
Half hour of CPR; what happened?
Sweating, crying, anxious, exhausted... I can't give up!
His parents screaming, fearful, desperate...
Someone calls it
We stop.
Heart rate 120.
The helicopter arrives
Helpless, I watch from the helipad. He takes off for his last ride...
Code blue
