Exercise Survey

The purpose of the study is to determine the amount and quality of physical activity education received by medical students during their training. The last study done on this topic was performed in 2013. We are looking for updated information, especially in light of the recent release of the 2018 National Physical Activity Guidelines.

Our group would like to present this data at medical school, resident, and sports medicine fellowship forums so that groups know the current status of physical activity education. This is important if we are to improve the health and well-being of our patients using non-pharmacologic methods, such as exercise and diet. Thank you in advance for your participation.

For questions 7-14, please respond to all questions about your previous and current years of medical school. For your current year, indicate any instruction that you have received thus far.

Please contact any of our team members if you have questions or comments about the survey.

Dr. Irfan Asif (imasif@uabmc.edu)

Candace Adedokun (candyade@uab.edu)

Wesley Curles (wcurles@uab.edu)
