

Family Medicine

THE OFFICIAL JOURNAL OF THE SOCIETY OF TEACHERS OF FAMILY MEDICINE

Appendix Table A. Relational Analysis (Spearman Correlations)

	How many residents (total complement) were in your program as of July 2022?	How important do you personally feel it is to educate residents about health disparities associated with incarceration?	A history of former incarceration is a common experience shared by patients in my residency clinic.	Students matriculating into my residency program are well-prepared to provide effective care to formerly incarcerated patients.	Residents welcome formal didactic or reading assignments on health disparities associated with incarceration.	Residents welcome mandatory/required clinical experiences on health disparities associated with incarceration.	Residents in my program have chosen elective clinical experiences on health disparities associated with incarceration.	Graduates of my residency program are well-prepared to provide effective care to formerly incarcerated patients.
What is the approximate size of the community in which your program is located?	.28*	.08	.10	.05	.22*	.12	.15*	.15*
How many residents (total complement) were in your program as of July 2022?		.05	.03	-.06	.10	.10	.15*	.08
How important do you personally feel it is to educate residents about health disparities associated with incarceration?			.30*	.03	.33*	.27*	.13*	.13*
A history of former incarceration is a common experience shared by patients				.18*	.25*	.20*	.31*	.29*

in my residency clinic.								
Students matriculating into my residency program are well-prepared to provide effective care to formerly incarcerated patients.					.13*	.17*	.23*	.51*
Residents welcome formal didactic or reading assignments on health disparities associated with incarceration.						.70*	.47*	.25*
Residents welcome mandatory/required clinical experiences on health disparities associated with incarceration.							.43*	.28*
Residents in my program have chosen elective clinical experiences on health disparities associated with incarceration.								.35*

*Spearman correlation is statistically significant ($P \leq .050$).
