

# Family Medicine

THE OFFICIAL JOURNAL OF THE SOCIETY OF TEACHERS OF FAMILY MEDICINE

## APPENDIX – Initial Request for Participants' List of Elements for Inclusion

Hi [*Panelist*],

For one of the MSK Educational Collaborative's projects, I'd love to chat on the phone for truly just 5-10 minutes in the next few days, to brainstorm the elements and learning objectives for foundational musculoskeletal training in med students before they head off to family medicine residency.

If you'd prefer to just email back right now with a list of all the things you can think of, that works too. Prompt is below.

Otherwise, please let me know if you have 5-10 minutes to talk on the phone just to get some preliminary ideas going. Thanks so much!

*[contact information and sign-off]*

Prompt: "Please list any and all elements that could or should be included in a meaningful 4th year elective in musculoskeletal medicine"

(ex. Injection on model, journal club, sideline coverage, preparticipation physicals, ultrasound, knee injection, forearm fracture splinting, hyperthermia management, EKG interpretation in athletes...)
